PHAM QUANG HUY
JUNIOR MOBILE DEVELOPER

CONTACT

- ✉ phamquangnamhuy1908@gmail.com
- ⬡ github.com/huyIT203
- in linkedin.com/in/phạmquanghuy
- ◉ Vietnam

TECHNICAL SKILLS

- Mobile Development (Core)
- Flutter, Dart
- State Management: BLoC
- REST API Integration: Dio
- Authentication: JWT, Google OAuth, Facebook Auth
- Local Storage: Hive, Flutter Secure Storage
- Image Handling: Upload, Caching, Compression

SUPPORTING

- Backend & Tools
- PostgreSQL (intermediate level)
- Docker & Docker Compose

LANGUAGES

- English Intermediate (B2)

SOFT SKILLS

- Problem Solving
- Self-learning
- Time Management
- Communication
- Responsibility

PROFILE

Flutter Mobile Developer focuses on building mobile applications (iOS/Android) using Flutter & Dart.
Has practical experience with BLoC, Clean Architecture, REST API integration, handling complex state, forms, calendars, and images.
Has backend capabilities to facilitate efficient distribution between mobile applications and servers.

PROJECT

Outfit Planner – Smart Outfit Planning Mobile App
PERSONAL PROJECT | 2025

⬡ github.com/huyIT203/outfit-planner

- Designed a microservices-based system for outfit management and smart recommendations.
- Developed RESTful backend APIs using Node.js (TypeScript), Express, PostgreSQL, and Prisma ORM.
- Implemented authentication with JWT, Google OAuth, Facebook Login, and email verification.
- Built core features: wardrobe items, outfit creation, calendar-based OOTD tracking, and outfit history.
- Integrated ML service (FastAPI) for image background removal and future outfit recommendation features.

Technologies: Node.js (TypeScript), Express, PostgreSQL, Prisma, Redis, Flutter, FastAPI, Docker

Sparkly – Smart Nutrition & Health
| 2025

⬡ github.com/huyIT203/Healthylife-sparkly

- Implemented JWT authentication with access & refresh tokens, including Google and Facebook login.
- Built core features: meal logging, BMR calculation, nutrition analytics, water tracking, and health goals.
- Integrated REST APIs from Spring Boot backend using Dio, with secure token handling.
- Worked with a microservice-based architecture, integrating a FastAPI nutrition engine.

EDUCATION

HUTECH - Ho Chi Minh City University of Technology   2021 – 2025
Bachelor of Software Engineering
GPA: 3.4 / 4.0

June,2025

- **AWS - The First Cloud Journey** |Oct,2025
